
HELIXREADER

Cognitive Pacing & Active Retention

Reinventing how we absorb knowledge from digital screens by merging visual pacing with active recall hooks.

GitHub Repository: github.com/hardik-arora/helix-reader

The Digital Reading Crisis

THE FRICTION POINTS

- **The Skimming Epidemic:**

Over 70% of readers scan pages in an F-pattern, missing up to 50% of the core content. This superficial processing blocks semantic recall.

- **The Retention Leak:**

According to the Ebbinghaus forgetting curve, 80% of newly read vocabulary and data points are lost within 24 hours without immediate reinforcement logs.

- **Tool Fragmentation:**

Modern readers must jump between document readers, search engines, vocabulary trackers, and visual pace training apps, breaking focus.

THE HELIX SYSTEM

- **Visual Pacing:**

Line-focused highlighting anchors the reader's eyes, eliminating visual regression and helping them double reading speed.

- **Active Capture Hooks:**

A low-friction, double-click lookup captures definitions inline, saving words immediately into study decks to bypass memory leaks.

- **Multi-Sensory Alignment:**

Synergizing speed-controlled audio narration with visual highlights to maximize neural retention loops.

The Product Pillars

01

Guided Reading Guide

- Paces the reader through customizable margins, margins rules, and paced guide bars.
- Reduces eye-regression, helping readers absorb complex blocks of text systematically.
- Ideal for long research papers, literature reviews, and digital textbooks.

02

Active Vocabulary Deck

- Replaces standard browser lookup tabs. Double-click to instantly map words to local definitions.
- Caches review cards automatically into persistent flashcard decks.
- Shifts parsed vocabulary from passive recognition to active usage and retention.

03

Context Library Hub

- A unified personal uploader bookshelf supporting custom TXT and EPUB files.
- Syncs reading history and displays cover art dynamically via Open Library API integration.
- Calculates telemetry readings like speeds (WPM) and completion rates.

Target Market & Social Impact

Solving for Diverse Learners

Helix Reader targets critical friction areas in visual learning and active document parsing.

- **Academic & Researchers:** Accelerating data analysis schedules by helping them parse papers and documentation efficiently.
- **Neurodivergent Accessibility:** Providing dyslexia-friendly fonts, focus guides, and adjustable speed pacing for readers with ADHD.
- **Life-Long Learners:** Helping professionals consume newsletters and learning logs systematically.

The Habit Loop & Gamification

Hooking User Consistency

Turning standard digital reading into active, progression-based loops.

- **Reading XP loops:** Rewarding visual experience points dynamically for focus durations. Time spent reading translates directly to level milestones.
- **Milestone Badges:** Creating accomplishment loops for long-term consistency. Rewards like 'Vocabulary Master' keep learners engaged.
- **Daily Pacing Streaks:** Visual feedback dashboards that keep users motivated to maintain daily reading streaks.

THE BEHAVIORAL DASHBOARD

■ LEVEL 4 MASTER READER

Current Progress: 4,250 XP (Reward Loops Active)

■ SPEED VELOCITY

Live velocity indicators tracking WPM speeds

■ VOCABULARY DECKS

Logs cards, translations, and flashcard recall scores

■ CREDENTIAL BADGES

Unlocks to keep learners consistently motivated

Venture Roadmap & Scale

PHASE 1

Universal Web Clipper

Bringing guided line pacing and direct vocabulary mapping to any web article, newsletter, or newspaper page.

PHASE 2

Personalized Audio

Multi-speaker high-fidelity custom narrator voices to enable dual reading models (reading + listening).

PHASE 3

Institutional Portals

B2B integration linking student progress to dashboards in school learning management systems.
